

Curriculet - www.curriculet.com

Textbased: Library, Upload own documents, Upload via URL

The screenshot displays the Curriculet interface. On the left, the poem "Jabberwocky" by Lewis Carroll is shown with several words highlighted in yellow: "Tumtum tree", "Jubjub bird", and "Bumfuzzle". On the right, a "Question" overlay is visible, asking: "What are the similarities between the terms *Jubjub bird* and *Tumtum tree*?" The overlay includes a text input area and a "Close" button. A vertical sidebar on the right contains icons for document, question, and search.

You can use our curriculets.

We have hundreds of curriculets that contain questions, videos, annotations and quizzes. All of our teacher-created questions and quizzes are tied to Common Core standards, and they're all editable, so you can add to or modify these to suit your own teaching purposes. To access our ready-to-teach curriculum, visit the **Store**.

You can build your own curriculets.

You can build curriculets from scratch using any of the texts in the Store. Simply select the book you want and you will be given the option of creating a new curriculet and adding your own questions, annotations and quizzes. For instructions on how to do this, see "**Making Curriculets.**"

You can build curriculets using your own texts. You can extract content from a URL or upload content from a file and we'll upload it to your **Library**. You can then create your own curriculet following the same steps outlined in "**Making Curriculets.**" You can find the links to upload content on the **Library** page.

You can also view rich reports on student progress and Common Core mastery, assign readings from books that don't contain questions, share curriculets with other teachers, and use theirs.

What to do:

Reading Book: Commenting and Questioning, Students develop own Questions and share them.

Evaluation of reading

Problems: Privacy, copyright, high effort
